

PROTECT OUR AIR

Where did the blue skies go?

HEALTH WARNING:

There is aerosol spraying underway over many countries, making people sick, exhausted & agitated go to www.ChemtrailsProject.com

There are aircraft on most days spraying mixtures which are very harmful to our health over many countries: the USA, UK, most European countries, Canada, Australia, New Zealand, etc.

Millions of people are filming this. Thousands of videos from many countries in many languages are on YouTube and other video sites. People around the world are alarmed by this criminal spraying and are trying to find a way to stop it.

This is NOT on the news.

OBSERVE! LOOK IN THE SKY: On most days you will see there are some aircraft which leave no trail or a short trail behind them (this is a normal contrail), and you will see other aircraft which leave a very long or continuous trail. If you watch for one hour, you will see the very long trails do not disappear, they expand in size instead. The white

substances released have been analyzed hundreds of times, and are shown to be a highly toxic. We have all been breathing large quantities of this substance for many years. It has a very bad effect on all life, not just humans. You don't need to believe this flyer; the research is available - check it out for yourself, for the health of your family and neighbors!

WE CAN STOP THIS POISONOUS SPRAYING IF WE ALL ACT TOGETHER

Please copy this leaflet and distribute

Visit www.chemtrailsproject.com -learn how to test your soil and rainwater & how we can work together to stop this. Watch the video

'What in the World Are They Spraying'
on the site.
